Cypress - Basic Website Navigation Test

Objective: Verify that the system successfully loads a webpage using automated testing.

Tool Used: Cypress

Test Steps:

1. Open the Cypress test environment
2. Run the test script
3. Navigate to the URL: <https://example.com>

Test Script:

```
describe('My first test', () => {  
  it('visits a website', () => {  
    cy.visit('https://example.com')  
  })  
})
```

Expected Result: The webpage should load successfully without any errors.

Actual Result: The webpage loaded successfully, displaying the "Example Domain" page.

Status: Passed
